

MANDURAH ENTRANCE ROAD Changes to Gordon Road in Greenfields

Southern Gateway Alliance (SGA) will be upgrading the Gordon Road and Education Drive intersection as part of the Mandurah Entrance Road (MER).

Work is expected to commence around the end of July 2010 and will take approximately 4-6 weeks to complete.

The works will involve road widening, footpath and median modifications, and the installation of traffic signals and street lights.

The intersection is being upgraded to improve safety and traffic flow and better cater for the change in traffic volumes expected once the MER is opened to traffic.

What will happen to traffic?

Traffic management including speed restrictions will be in place throughout the construction period.

Traffic controllers will assist with pedestrian movements through the site while works are occurring on the existing path. However, the footpath works will be scheduled to occur only when there is minimal pedestrian activity expected.

Road users are asked to take care when approaching the work site and expect some delays during the works.

SGA apologises for any inconvenience and thanks road users for their patience and cooperation.

Further information

If you would like to know more about the traffic changes or the project, please contact the Community Relations team on freecall 1800 671 211 or email enquiries@sga.incite.com.au
